

Cleaning Technologies for Metal Finishing Applications

We understand
**YOUR
PERFORMANCE**
is directly related
TO OURS.

At KYZEN, we go way beyond delivering the leading cleaning science to you. We care enough to problem solve and thoroughly understand your specific industrial cleaning needs, first. Today, this convergence of science and care produces the world's most effective environmentally responsible cleaning technologies, as it has for over 30 years. And, that makes all the difference.

Modified Alcohol & Hydrocarbon Products

AN IDEAL MATCH FOR VACUUM VAPOR DEGREASING EQUIPMENTS

KYZEN's METALNOX product line was innovated to thoroughly clean a variety of metal assemblies and parts. This line has become the leader in industrial precision cleaning for its superior ability in cleaning tough soils.

METALNOX® M6381

Precision Hydrocarbon Solvent Cleaner

METALNOX M6381 is an aliphatic hydrocarbon solvent specially designed for removal of machining oils, grease, and other non-polar soils. It is safe on a wide range of metal types. M6381 is used extensively in vacuum vapor degreasers.

METALNOX® M6386

Modified Alcohol Solvent Cleaner

METALNOX M6386 is a modified alcohol based solvent designed to clean a wide range of polar and non-polar oils and coolants, from steel, brass, aluminum and all other metals. This chemistry dries completely without leaving residues. M6386 was designed for vacuum degreasing machines incorporating spray, ultrasonics, and rotation.

MODIFIED ALCOHOL & HYDROCARBON SUPPORT PRODUCTS

KYZEN CP81 & CP86

Corrosion Preventative Additives

KYZEN offers a complete line of heavy duty blends of organic rust inhibitors specifically designed to be used with modified alcohol and hydrocarbon solvents. Both products offer short-term and long-term protection on a variety of metal parts.

KYZEN BOOSTER 81 & 86

Maintenance Boosters

KYZEN additives are designed to stop the formation of and neutralize acidic materials that may form in degreasing systems while removing chlorine containing oils.

KYZEN ACID ACCEPTANCE KITS

These special order kits are specifically designed for the controlling and monitoring the acidity of METALNOX M6381 & METALNOX M6386, when removing chlorinated oils.

*Aqueous, Semi-Aqueous and Vapor Phase Chemistries • Process Evaluation and Optimization
Contract Cleaning • Cleanliness Testing • Soil Analysis*
