

# ELECTRONIC ASSEMBLY MAINTENANCE

Maintenance plays an important part to keep your EAC equipment running correctly, and is essential to ensure you're performing to the best of your ability for years to come.

## REFLOW OVEN / WAVE SOLDER APPLICATIONS

### SUGGESTED PRODUCTS:

#### **CYBERSOLV C8502**

All purpose, non-flammable preventative maintenance cleaner to remove flux, grease, and other residue build-up.

#### **CYBERSOLV C8508**

Heavy duty, non-flammable, surface maintenance cleaner for burnt on residues.

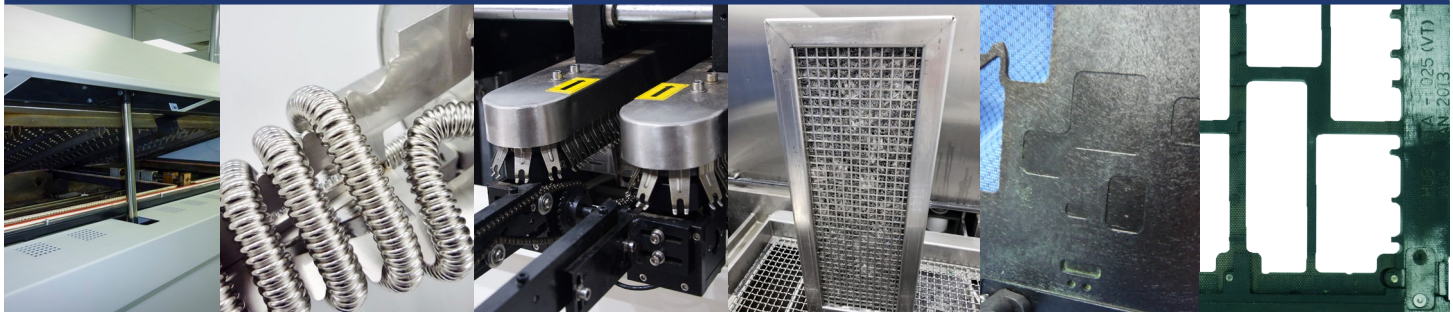

### APPLICATIONS:

#### **Hand Wipe of Interior and Exterior:**

- Reflow Oven
- Wave Solder
- Spray Flux Systems
- Other Assembly Equipment

#### **Soak, Spray Under Immersion, Brush, and Ultrasonic Cleaning Processes:**

- Wave Solder Finger Cleaner
- Solder Oven Chains
- Filters, Condensers, Traps, & Radiators

## GENERAL MAINTENANCE AND PALLET CLEANER

### SUGGESTED PRODUCTS:

#### **KYZEN E5322**

Aluminum safe, heavy duty aqueous solution for ultrasonic and soak cleaning systems.

#### **KYZEN E5325**

Aqueous cleaning chemistry for spray-in-air or spray under immersion systems that removes baked on soil and is aluminum safe.

### APPLICATIONS:

#### **Soak, Brush, Spray-In-Air, Immersion, and Ultrasonic Cleaning Processes:**

- Solder Pallets
- Process Carriers
- Fixtures
- Solder Oven Chains
- Filters, Condensers, Traps, & Radiators
- General Parts Cleaning
