

Maintenance Series: Spray Nozzles

Session Questions and Answers

Q: What if the nozzles wear? Can it be repaired?

A: Worn nozzles can't be repaired or refurbished to look new. It just has to be replaced with a new one.

Q: Can I clean with a toothbrush?

A: Yes, as long as the brush material is softer than the nozzle. It should be fine on plastic nozzle material as well.

Q: What if I failed to get a nozzle installed at the correct angle?

A: You may have to contact a machine supplier for help if the attempts have failed.
